

## ***CURRICULUM VITAE***

***Omar Raúl Masera Cerutti***

OCTOBER 2010

### **1. Personal Data**

Date of Birth: 30 January 1961  
Place of Birth: Mendoza, Argentina. Naturalizado Mexicano.  
Home address: Reforma Agraria 400, Fraccionamiento el Pueblito, Casa 51, Morelia 58314, Michoacán, México. Tel 01-443-3201056.  
Work address: Apartado Postal 27-3 (Xangari), CP 58089 Morelia, Michoacán, MEXICO. Teléfonos (52)(5) 6232709, FAX (52)(5) 6232719.  
Email: [omasera@gmail.com](mailto:omasera@gmail.com)

### **2 Education**

1981-1987 Bachelor in Physics Facultad de Ciencias Universidad Nacional Autónoma de México, México D.F.  
1988-1990 M.S.C in energy and natural resource Energy and Resources Group, University of California, Berkeley  
1990-1994 Ph.D in Energy and Natural Resources Energy and Resources Group, University of California, Berkeley.

### **3. Overview**

Currently Dr. Masera is the full-time professor at the Centro de Investigaciones en Ecosistemas, Universidad Nacional Autónoma de México (UNAM) where he is also Director of the Bioenergy Laboratory. He is also currently the President of the Mexican Bioenergy Network (REMIO). Dr. Masera leads the “Patsari Cookstove Project” in Mexico, an interdisciplinary and international collaborative approach directed to the development and dissemination of sustainable alternatives for rural cooking in Mexico, which has obtained national and international recognition. Dr. Masera has published 5 books, more than 160 peer reviewed publications, and several research reports addressing bioenergy, the role of forests in global climate change,

future energy and forestry scenarios, sustainability of technological change in rural areas, and other topics. He has documented 930 citations to his publications. He has developed technologies for the efficient use of biomass in rural households, and studied the time and spatial dynamics of fuelwood use in rural areas and their associated local and global environmental impacts. He co-developed the WISDOM model, a spatial explicit tool to identify biomass energy “hotspots” at different geographical scales, currently applied in case studies around the world. With a group of four research institutions of Latin America and Europe, Dr. Masera co-developed the model “CO2fix”, that allows estimating dynamically the carbon sequestration of alternative mitigation options in the forestry sector. This model is currently used in 80 countries around the world. Within the field of sustainability, Dr. Masera has developed the MESMIS framework, a participatory tool for the assessment of the sustainability implications of alternative natural resource management systems in agriculture and forestry. The MESMIS framework has been applied to more than 50 case studies from different Latin-American countries, and is being used in the graduate programs of 15 Universities within the region.

Dr. Masera has graduated a total of 20 students, and actively participates in graduate programs of Mexico and Spain. He has coordinated national and international research groups and raised research funds from 25 projects with International Funding Agencies such as the European Union, the World Bank, InterAmerican Development Bank and others, as well as Mexican Government and Private Institutions. He has given more than 150 presentations in seminars and conferences of 35 countries. He serves in the editorial board of 4 international journals in the area of energy and climate change.

Dr. Masera received the National Research Award for young scientists of the Mexican Academy of Sciences in 2000, the Nobel Peace Prize in 2007 as a member of IPCC and the Ashden Awards to Sustainable Energy in 2006. He was nominated to the International Panel on Climate Change (IPCC) in 1997 and participated in the last 6 major reports of the organization, including the coordination of chapters in three of these reports. He has been consultant to FAO, the United Nations Framework Convention for Climate Change (UNFCCC), UNDP, UNEP and the Mexican Government.

<sup>1</sup> La revista “*Energy for Sustainable Development*” no está indizada actualmente. Sin embargo cuenta con un proceso de arbitraje estricto, se publica regularmente desde hace 9 años y tiene una distribución muy amplia internacionalmente dentro de la investigación en energía rural. El comité editorial de la revista está formado por prestigiosos investigadores, varios de ellos reconocidos mundialmente. Por estas razones, la incluyo entre las publicaciones indizadas.
